

Performance Monitoring Permit Application Page 1 of 2

This application is required to fund and track performance monitoring inspections and follow-up as required by the county's NPDES Permit, during the performance monitoring bonding period immediately following construction. This is not an application for a permit to perform any construction in and of itself.

The applicant is required to provide the following information and/or acknowledge the following items:

1. This application provides for monitoring the condition and performance of site improvements associated with an individual site development construction permit and the corresponding performance monitoring guarantee (aka defect and maintenance guarantee).
2. The fees assessed on this application are annual fees and will become due upon application and annually on the anniversary date of permit issuance, each year until such time as the permit is finalled and the corresponding financial guarantee is released. The normal performance monitoring period is 24 months, but may be shortened or extended under certain provisions of the Pierce County Stormwater Management and Site Development Manual.
3. The proponent remains responsible for ongoing monitoring and maintenance of the required improvements throughout the performance monitoring period. The proponent is expected to keep records of his or her own inspections and maintenance activities per the approved O&M manual and will be required to submit these prior to release of the performance monitoring guarantee.
4. The applicant must provide at the time of application current contact information including a valid email address and/or fax number where county inspection results and correspondence may be directed. The proponent must notify the assigned county inspector in writing of any changes to the contact information associated with this application.
5. The proponent is responsible to provide safe, unimpeded access to the assigned inspector as necessary to complete the inspections associated with the resulting permit.
6. The proponent is responsible to correct deficiencies communicated by the county in a timely manner (normally 30 days) throughout the duration of the performance monitoring period. Any enforcement costs incurred due to the proponent's failure to respond may be billed to the principal of the performance monitoring guarantee.
7. Any unpaid fees or costs associated with this application or the resulting permit must be paid prior to final approval and/or the release of the associated performance monitoring guarantee.

To make application for this permit:

1. Fill in required data on Page 2 of this form.
2. Save if completing the fillable pdf form, or image printed and filled out copy.
3. Access the original site development construction permit online thru the permit search tab here; www.PierceCountyWA.org/Permit
4. Click on the orange 'I want to ...' button and select 'Create a related application'.
5. Follow the prompts and fill in the required information. When you reach the 'Attachments Section, upload this form.
6. Watch for the confirmation email to arrive (usually within 3 working days) and pay the specified application fee.
